HNGU MASTER PAPER FOR RDBMS

UNIT WISE

UNIT – 1

Q.1 what is concurrency ? explain three concurrency problems.
Q.2 discuss the concept of Deadlock with an example.
Q.3 Describe the concept of Media Recovery.
Q.4 what does ACID stand for in transaction management.
Q.5 what is shared lock ?
Q.6 Explain database recovery in details.
Q.7_____ property of ACID states that a transaction must be treated as an atomic unit.

UNIT – 2

Q.1 what are joins in SQL ? explain the different types of joins.
Q.2 use a suitable example to demonstrate aggregate functions.
Q.3 what is constraint explain with example.
Q.4 what is an integrity constraint ? explain its types in details.
Q.5 Explain any five string function with example.
Q.6 what is sub Query ?
Q.7 Define Dual table ?
Q.8 Explain DDL Command with an example.
Q.9 Explain DCL Command with an example.
Q.10 Explain DML command with an example.
Q.11 what is purpose of the WHERE clause in SQL ?
Q.12 what is the use of the GROUP BY clause.
Q.13 what does DDL stand for in SQL ?

UNIT – 3

Q.1 Explain the structure of PL/SQL block with an example.

Q.2 Describe procedure in PL/SQL .

Q.3 what is a sequence in SQL ? explain how it is created.

Q.4 what is the use of the GROUP BY clause ?

Q.5 what is the use of the SQL %ROWCOUNT attribute in PL/SQL.

Q.6 what is cursor ? explain types of cursor in detail.

Q.7 Discuss simple loop , while loop and for loop with example.

Q.8 difference between SQL and PL/SQL.

Q.9 Explain Error Handling in details.

UNIT – 4

Q.1 Explain the concept of a view how is view created ?

Q.2 Describe procedure in PL/SQL.

Q.3 what is sequence in SQL ? explain how is created.

Q.4 what is function ? explain it with example .

Q.5 explain trigger in details.

Q.6 what is difference between procedure and function.

Q.7 discuss Advantage of view.

Q.8 Define Indexes explain types of indexes.

Short question.

Q.1 Define Sequence

Q.2 List out LOB types in PL/SQL.

Q.3 what is the purpose of NEXTVAL function in a sequenced.

Q.4 which command is used to remove a view from database.
